

GAMING MOUSEPAD

GX-speed P100

Classic soft, maximum precision

GX-Speed Scorpion Edition is a slick cloth weave pad designed for precise and fast tracking during gaming. GX soft gaming mouse pads have non-slip natural thick rubber padding that provide a superb surface grip during extended gaming sessions and a dense, anti-fraying long-lasting stitched frame to tear your opponents to shreds, not your mouse pad.

Ultra-smooth surface

Whether using an optical or laser mouse, GX-Speed has a slick, taut weave for speedy mouse movements to give gamers access to pixel-precise targeting and tracking.

Non-slip natural rubber padding

The rubber base firmly bonded to the cloth helps keep the flexible surface in place and prevents the cloth from bunching up in front of the mouse, interfering with smooth mouse movement.

Anti-fraying stitched frame

The soft fabric improves comfort as the wrist moves back and forth across the mouse pad edge, by being more resistant to fraying or peeling.

Easy to carry

With a flexible cloth construction, you can use the binding strap to roll it up if you're on the move and it lies flat when you're ready to play.
